

American Finishing Resources is a recognized leader in the coatings industry. Our unique combination of offerings makes us a key partner in the finishing process for hundreds of companies.

AFR offers thermal and chemical coatings removal; custom hook, hanger and fixture design and in-house transportation services all under one roof. These products and services are supported by experienced professionals who know the coatings industry and are prepared to respond to your individual needs.

Most importantly, AFR has an unwavering commitment to the environment. Our testing, documentation, and waste disposal procedures are unparalleled among coatings removal companies. Our customers enjoy a unique "peace of mind" both now and into the future.

## COATING REMOVAL SERVICES

American Finishing Resources is the industry leader in coating removal services including coating removal from paint hooks, fixtures and racks, along with production parts cleaning and reclamation.

We understand the value of returning your products 100% clean. That is our standard each and every day. We know that anything less than totally clean hooks or parts can lead to coating defects and unnecessary finishing and production line downtime.

AFR's Thermal Clean™ Process ensures complete coating removal. This means your parts and fixtures are returned clean and free from ash, rust or residue, within lead times as short as 24 to 48 hours. With unsurpassed quality, reliability and customer service, AFR is dedicated to helping you achieve zero-defect finishing.

Our proprietary coating removal processes provide:

- Premium surface cleaning and preparation removing paint, powder coatings, e-coat, high temperature coatings, varnish, rust, ink, adhesives, lime, and oxides.
- Cleaning of substrates including steel, stainless steel, spring steel, aluminum castings, brass and copper.
- Separate processes used for paint hooks and production parts. This is the most efficient process to meet the unique needs of each product (no under baking or over baking) allowing for maximum care being taken to maintain the integrity of the part (no damage or warping).
- Utilization of custom designed carts to enhance productivity, minimize damage, and improve material handling of paint hooks, fixtures, and racks.

### AFR ADVANTAGE

- AFR features experienced applications engineers dedicated to continuous improvement of your overall finishing process. Our people will work with you on-site to assist in the design and manufacture of new hooks, hangers, fixtures and carts to streamline your operation and save you money.
- AFR owns and operates its own trucking company to ensure timely pick-up and delivery that can accommodate your multiple shift operations. Our drivers are phone and fax connected for immediate response and will assist in loading and unloading, even right to your paint line if necessary.
- AFR has an uncompromising commitment to environmental stewardship. We meet or exceed all municipal, state, and federal environmental standards. AFR's waste testing and disposal process does more to reduce your exposure to environmental compliance issues than any other coating removal supplier.
- AFR's dedicated customer service representatives are available throughout the business day to answer your questions, assist with coordinating service needs and oversee order processing.

The differences are clear. American Finishing Resources is the best choice for your coatings removal projects. Contact us today and we'll develop a custom tailored program guaranteed to improve your finishing line efficiency.
