FINISHING RESOURCES

American Finishing Resources is a recognized leader in the coatings industry. Our unique combination of offerings makes us a key partner in the finishing process for hundreds of companies.

AFR offers thermal and chemical coatings removal; custom hook, hanger and fixture design and in-house transportation services all under one roof. These products and services are supported by experienced professionals who know the coatings industry and are prepared to respond to your individual needs.

FABRICATION: CUSTOM HOOKS & FIXTURES

American Finishing Resources' engineers are experts at designing paint fixtures, hangers, and racks. We focus on achieving optimum line density, transfer efficiency, and loading ergonomics. American Finishing Resources features:

- Fixtures designed for conveyORIZED or batch finishing systems.
- Computer aided design (CAD) capabilities. All designs can be viewed electronically prior to prototyping and manufacturing.
- All manufacturing is done by experienced fabricators and certified welders offering you quick turnaround to ensure rapid response to your model changes.

ENHANCING EFFICIENCIES

American Finishing Resources can help maximize efficiencies through evaluating current procedures and making improvements in:

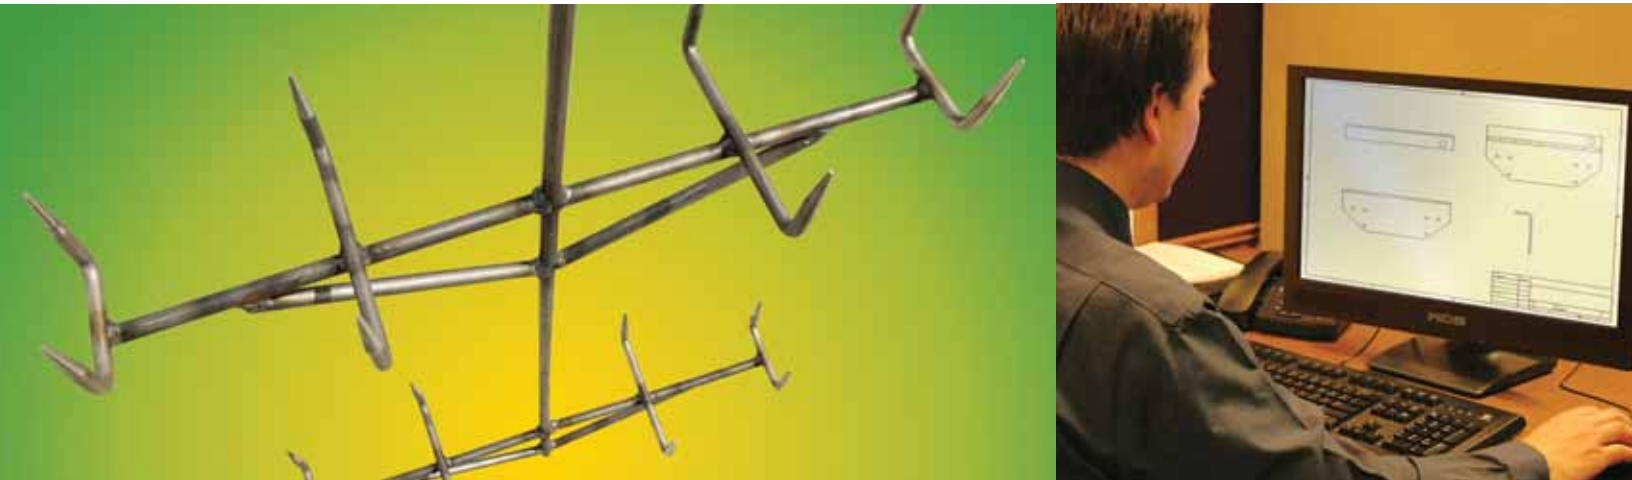

- Line density – the optimum number of parts on your paint line, shortening your product run time and increasing manufacturing flexibility.
- Efficiency in Part Presentation – designing a hook that maximizes transfer efficiency for every part, reducing raw materials, labor costs, and rework.
- Built-in masking – designing hooks that include masking properties, thus eliminating the cost of tapes and plugs.
- Ergonomics – minimize loading and unloading time with ergonomically designed hooks that are easier to handle, improving health and safety for your workforce.

CUSTOMIZED CART AND CARRIER DESIGNS

AFR designs high density carts and carriers to benefit every stage of your fixture cleaning and loading processes:

- Reducing cleaning costs through maximum fixture count per cart.

- Saving money through minimized damage to fixtures, hangers and racks.
- Efficiently using valuable plant floor space by minimizing the area needed to store fixtures, hangers and racks.
- Timely repair and modification services to keep your carts looking and performing like new.

AFR ADVANTAGE

- AFR features experienced applications engineers dedicated to the continuous improvement of your overall finishing process. Our people will work with you on-site to assist in the design and manufacture of new hooks, hangers, fixtures and carts to streamline your operation and save you money.
- AFR is an industry leader in coatings removal. Our thermal and chemical cleaning processes will keep your hooks, hangers and fixtures looking like new. We can also help you reclaim any painted production parts.
- AFR owns and operates its own trucking company to ensure timely pick-up and delivery that can accommodate your multiple shift operations. Our drivers are phone and fax connected for immediate response and will assist in loading and unloading, even right to your paint line if necessary.
- AFR has an uncompromising commitment to environmental stewardship. We meet or exceed all municipal, state, and federal environmental standards. AFR's waste testing and disposal process does more to reduce your exposure to environmental compliance issues than any other coating removal supplier.
- AFR's dedicated customer service representatives are available throughout the business day to answer your questions, assist with coordinating service needs and oversee order processing.

The differences are clear. American Finishing Resources is your best choice for the design and manufacture of custom hooks, hangers, fixtures and carts. Contact us today and we'll develop a custom tailored program guaranteed to improve your finishing line efficiency.
